## Introduction

You will enjoy reading this report as much as I enjoy writing it.

First of all let me say thank you for investing your time into reading it. You'll get back the invested time here hundred and thousands of times if you decide to apply just one of the tips described on the following pages.

So what's the matter? Why I decided to put all those words in front of your eyes? It is simple – you can learn a lot.

This is the first book from a large project I'm working on right now.

In this book you'll find? – Step-by-Step Practical Guide on how to acquire new information. Simple and easy to follow program, covering all aspects and stages of learning, studying, getting to know everything you want.

But application of the knowledge from the report is not about acquiring the information, only. It is about doing everything you want to be successful of. Just keep on reading.

After many years of studying and working on different fields of life I realized that the most important skill I need is to acquire new information. Yes, no matter how trivial it may sound, it is the skill number one you need in order to accomplish anything.

No matter what, you are learning 24/7. Here you'll find many answers of how to learn and how to study easily. Those answers cost me 30 years of personal experience with a lot of wrong doing and trial and error until I got it right.

Right for me could be wrong for you, though. Be careful and apply your own intuition and understanding while you are reading. I'm not saying that the described strategy is the only right way and that's it. No way! But by getting my answers you can find your own way more easily and that may prevent you from falling into the same trap I was.

What those traps could be. You know them, already: reading and not getting it, listening and not understanding, watching and being overwhelmed by the amount of information.

There is a very funny disease spreading through the world. It is called "learning disability". Do you know anybody who never experienced that kind of disability?

I'm constantly realizing that about 50% percent of my time has been spent in that state. This is simply a natural safety reaction of the mind.

So, did you get my point here? If you do, just keep on reading and you'll find many, many answers, which otherwise may take you let say 30 years of falling into the same loopholes.

Go trough the book and than do it again while applying the system and steps described bellow. Give it a try and I can assure you that you are going to enjoy it and use it to the rest of your life. Being proficient in acquiring new knowledge, knowing how to learn, is a crucial step to your ultimate success in everything you do on this physical plane.

What you will achieve when applying the system? You will develop your own systems in any other fields. For example, you'll find all you need to build a perfect health and wealth. All

you need to manifest a perfect body, mind and start your spiritual journey.

I hope that you enjoy reading, so far. Keep going ahead and get as enthusiastic as you can while doing that. Let's enjoy that moment. One very important tip: Enjoy the moment NOW!

So, let's get started,

## **How to Unleash Your Inner Learning Power And to acquire New Information from Printed Text, Audio and Video Sources**

Please, don't get me wrong here. I know that you can read, listen and watch. But there is a hundreds of miles distance between reading the book and getting the information from that book and put it into work. On the following lines I'll try to explain.

I have been reading books since age of 4 and that is something I really like to do. In the process of reading I find out that one can read a book for pleasure, but using the information and applying it requires some tricks.

Let's make a deal here: anytime I use the verb read, I'll include listen and watch in its meaning, just for simplicity of expression. The word text or book will include any audio and video information, too. Thank you for your cooperation on that.

Do not wary. There will be no efforts or pushing yourself to understand the information or remember it word by word. There is nothing like that for you to do here. Actually, you have to do exactly the opposite – relax and have fun.

Yes, when you read something which is completely impossible to even grasp with your mind – just relax and laugh on it.

The steps are:

1. Answer the question – Why I need to learn that information?
2. Define your goal. For example: My goal is to study that lesson on biology/ to write my homework / to prepare for a presentation...
3. Read (listen, watch)) the entire information (book, lesson, article, essay, video, DVD...) and enjoy it
4. Repetition - Divide the information on small, digestible sections and read it again
5. Act as per your goal.

So, congratulation, this is it. No efforts, needed. You will get the learning process done just by using unleashed power of your subconscious and conscious mind.

Let's dive into more detailed explanation and learn about all those hidden tricks and methods you can use in order to awake and boost your inner learning power.

**Step 1: Answer the question**  
**Why I need to learn that information?**

Why I need to do that? - This is the most important question you have to answer before you do anything in our life. Why I need this car, house, job, relationship?

It's so important to answer that question. Think for a moment what our life is all about: jumping from one goal to another. If we did not answer why you have to do this and that, the life will be over before even you'll be able to realize what was that all about.

You may reach to the end of this wonderful journey, called Life, lacking the very essence of it. And here you are in front of a very important question:

“Why I am on this planet as a human being?”

Did you get that answer? It took me 30 years to reach it? Once you have that prime question answered, it is so easy to define your priorities in the life.

It's never late to answer the “Why?” question, as soon as you realize the necessity of doing that, and stick to it in everything you do.

“Why?” question will save a lot of time and clear many unnecessary activities from the life. It will elevate you to the broader knowledge and understanding of everything you do.

Time is the only treasure you have and it matters where you invest it.

Here is a trick, I use every time, in order to decide should I invest my time in this informational package (book, article, video):

- Read the Contents page
- Read the first and the last paragraph of every chapter
- Spend a moment to collect your thoughts.
- Make a preliminary Yes/No decision about the information  
YES – means you will study it; NO – means you will not waste your time on it.
- Carefully look inside of you and find out how you feel about the above decision. Good feelings means Yes, bad feelings – No! Simple, huh.
- Take a final Yes/No decision and follow it

Once you do it you'll be done with the most difficult part of this entire learning process. That will save you enormous amount of time wasted in a meaningless activities.

No kidding!

Your final decision has to be recorded on the piece of paper. Then read what you just wrote down out loud. Writing it down and reading it out loud will project it over the subconscious mind and activate your hidden inner power.

Yes, read it out loud. Very important and very difficult step. ☺

Every time you make an important decision, congratulate yourself:

“Congratulation! I just successfully accomplished my first and most important step in this task.

## **Step 2: Define your goal**

Define the goal you want to achieve by acquiring that particular information.

It is O.K. to have a major goal in the life and mid and short term goals. While the major goal is very closely connected to answering the “Why?” question, short term goals need to defining your goal, to create an image on how you are going to use that knowledge or skill right here and now.

The next hint you have to consider is:

Should I do that or delegate it to somebody else?

I can see your eyebrows raising up, here. Remember, you have one treasure, only, and this is your time. Can you afford the time to cover all the information you need in these days with information overload? - No way!

So, this is what the smart guys do: They delegate! They have friends, students, employee, associates and they use their time wisely. Please, always consider this option every time you have to take a decision on doing something.

If you now what you are doing, you're on the way to build your own business empire. Do you know what the presidents and CEOs of the companies are doing most of the time? They delegate wisely. So, learn that skill, you'll need it soon.

If you decide to delegate, make sure that the outcome will be with the same quality end even better than you can do.

How you can apply delegation in a school and college environment? Very simple build a study group on the topic you need to prepare and learn together. That simple technique plays the major role in all my educational achievements: Master degree in Maritime Navigation and Master degree in Statistics (on age of 45).

The next thing you have to do is to decide the priority of that particular task. How important is that information and according to that when you have to accomplish it. There are two options again: Do it! or Deliberate it!

Do it! – means start today

Deliberate it! – Means do it later. When exactly? O.K., you can schedule that time now or decide when you are going to decide about it. Make sure that you do not skip that date.

There is no doubt here, that you have to cover that book by yourself. If you read it carefully you'll find that I'm giving you a recipe on how to do everything in a successful way.

Once you answer the “Why?” question, this second step is easy to complete. You know why you are reading, listening or watching and now you have to state clearly what exactly has to be done during or after getting that knowledge.

You may need to write down your homework, write an essay, article, make a presentation and complete your research or dissertation, learn a practical skill or just a simple trick in order to improve yourself in certain area. So, write it down...

Feel free to use you Practical Guide at the end of the book. Do not be afraid to exercise. No goal can be achieved without action. I cannot stress enough on that!

So do it now! Make a practical step. Write down what is goal. All you need here is:

**ACTION!      ACTION!      ACTION!      ACTION!**

In writing down your goal you are conditioning your conscious and subconscious mind towards achieving the goal. Read the goal out loud. Feel free to do it as many times as you want. Be relaxed, happy, excited while you reading your goal.

## Practical Dreaming

So, let's start creating our miracle. We are going to use the latest discoveries from the quantum physics and modern psychology, here. But most important, we are going to become experts on Practical Dreaming.

What is Practical Dreaming? Follow the explanation here: Close your eyes and see yourself how happy and excited you are while achieving the goal. Try to see that moment with as many details as possible like: the product or work you have to do is already accomplished, in front of you and it is brilliant piece of art; you and your close friends, relatives are all so happy to see it and so proud of being around you. Or see yourself going through the final exam and achieving the results you have been dreaming for.

As you see yourself happy and glorious at the final step, let's continue dreaming. Now, see yourself how you are moving towards the goal. You are happy and everything is easily coming to you in order to get into the final point of success.

Release the above dreams and keep that state of profound happiness inside of you. Now you have already achieved everything you want. The rest is; allowing the world to bring you to that final point you just have chosen.

So, all you need here is to use your imagination. Create an internal movie and play the main character in it. How hard is that to be done? I, know, it may sound weird. I've been there, too. Please, remember that I'm sharing with you personal experience, collected from the last 30 years.

Life is a game and those who play that game as per their dreams are the only winners. Look around yourself. How many winners

you see? And how many non-winners you see? You know now what the difference between both of them is.

Use your imagination again to make a choice which game you want to play. The game of the practical dreamer or the game of the .....You name it!

In Step 1 and 2 all you are doing is generating internal energy in order to complete the job in a best possible way. Very powerful aspects of your personal energy are your Emotions.

Emotions are very subtle, high frequency waves emanated from within, which are able to create miracles, if used in a proper way. So far, you have been placing yourself consciously in a position to perform the task in a perfect way.

Creating positive images within, like the one you did above, is a major step on involving the power of emotions into that task. If you see yourself in a way you like, that will trigger enormous amount of positive feelings.

Due to that, I'll repeat and remind you constantly to do everything from here and now while being in a state of highly positive emotions. It is simple – just be enthusiastic in everything you do.

How to keep that enthusiasm on? Use your imagination – see yourself at the place where you will be after successful completion of the task you are performing now. Use that simple trick any time you feel like losing your enthusiasm.

Keeping emotions high is like keeping the pressure in your car tires high enough in order to arrive to your point of destination. Imagine what will be if you try to drive with flat tires. What your speed will be? How far you can reach like that?

And that is exactly what the majority of people around you are doing. Most of them are trying to reach their goals with flat tires. Would you ever allow yourself again to act like this? Do you have enough time to keep on acting like that?

I have no doubt that you have achieved very important things in your life so far. Can you remember those moments? Call back that segment of your life. See that movie again and find out for yourself about enthusiasm, passion, emotions.

I know you've got it now. You know now why you have been successful, whenever you have been successful and why you have been not successful, whenever that happened.

If you take nothing but this knowledge alone, that will change your life forever. You will never ever do something you have no passion, enthusiasm, positive emotions. It is wasting your time and setting the trap of great disappointment.

From time to time remind yourself about why you're doing, whatever you're doing and keep your goal constantly in front of you. All this is to "pump" your enthusiasm and move ahead as fast as you can.

Meanwhile, we have to do some practical steps, some ACTION in order to help the world for quicker manifestation of our dream.

Let's do it!

**Step 3: Read, listen, watch the entire information - book, lesson, article, essay, video, DVD... and enjoy it**

Read the entire information being as emotional as you can be. Just enjoy it! Have fun! Be excited! Awake your imagination and see yourself as you are going through your life and applying extremely successfully all you are getting from that piece of information.

You are the main hero in the book you are the Invincible Man – Superman, Batman, Spiderman... - who goes out and accomplishes everything to the smaller detail in a perfect way.

Look at how happy and complete you feel within, when you are doing all those miracles. Look how the people around you admire all you do. Keep on reading in that way until you get to the very end of the book.

If you get over to a point where you do not understand something, do not stop and reflect on that. Keep momentum and go ahead. Enjoy the moment when you got that awareness that you do not understand something. Just make fun of that to yourself and go ahead.

So, the entire information has been covered. Take a moment of internal appreciation from the first impression. See yourself as a very successful person, enjoying every bit of your life as you go through it, using the information just delivered to you.

Now you have an idea what this book is all about. You can see the entire battlefield of learning process. You know already, where are your strong points and weak points. That is very

important stage of the entire process of getting to the point of understanding.

Why you have to do that? There is a scientific explanation after few paragraphs below, but I want to tell you something more important than that.

In this very moment, right here and right now, while you are reading those words your life is running, too. This is your Life. The only treasure you have in that life is your Time.

And your time is constantly running away. Don't you want to spent it in a most precious way? Don't you want to enjoy every bit of it? Than, just do it! Enjoy your life right here and right now.

I know, you ask yourself why this guy is telling me to do something while I'm reading a book and nothing "real" happens? It is just my imagination and that's it. Yes, that is correct. It is just your imagination and it **is always your imagination!**

When something really happens in front of your eyes, your reaction is based on your imagination. And when you reflect on that later on, you have to use your imagination to remember it, right?

So, take a moment and think about it. Close your eyes and use your imagination to get to your answer☺.

This stage of covering entire material is very important for setting up your goal in a very emotional way. In fact that first reading is going to make very strong impression on subconscious level. That will assure solid support to your conscious mind for accepting the information and act upon it later on.

You can use that technique to acquire any knowledge you want or need in a very short time without being overload and without any mental blockages. Just enjoy reading and use your imagination.

Do you see yourself as a happy person while reading now? Why not, it is so easy. Let's have fun.

#### **Step 4: Repetition - Divide the information on small, digestible sections and read it again**

What's next? ... Repetition, guys. You have to do it again. But now, do it slowly. Step by step, bit by bit. Sounds boring? ... Let's see.

Repetition is something we always do, whenever we have to memorize or learn, right? But now we are going to learn how to do it by unleashing the enormous power of our mind.

All informational materials are divided into sections, chapters, paragraphs. The same is true for the audio, video and DVD sources. You have to decide what amount of information is O.K for you to read on one session, no longer than 20-30 minutes.

Keep your timing within those limits in order to achieve maximum effectiveness. Once you master the process you can start experimenting with longer time periods.

Bear with me for now.

In case of very complicated article or scientific information the amount of information for one session could be limited to one paragraph or even a single line or word.

If the information, for example this book, is on your computer, you may print it or read it from your laptop. Chose whatever is more convenient for you. I recommend printing out the material. It is safer for your eyes and easy to carry with you in sections.

Make sure that there is a pen and a mid size notebook on your night stand. It is a good habit to keep those items there.

When you go to your bed, make yourself comfortable and read, listen or watch the entire piece of information, prepared in advance. Be as indifferent to the text as you can. Be completely relaxed.

If case of reading, when your eyes go through the lines see the words as they are written in the sand on the seashore. The wave comes and they disappear. The wave goes back and the next line appears.

With listening and watching is even easier. Simply allow your mind to imbibe the words and images as they come to you.

Why we have to do that? Let's use the sponge example. Squeeze it and immerse it in the water. Then remove it and try to get the water out of it. Now, do the same, immerse the sponge in the water, but don't squeeze it and get the water out in a separate vessel. In which case you got more water out of the sponge?

Now imagine that the sponge is your mind and the water is the information you need to acquire. If you force your mind to understand every single statement, while reading, you are performing an action of hardening, squeezing and that restricts your ability to acquire the information.

Now, if you keep you mind relaxed and open, the information will soak within and easily reach the subconscious levels. And bingo! You got it! The rest is going to be as per your dream.

How difficult is that? I, know, it is difficult to accept that the above is working. But there is only one way to realize that - Give

it a chance! There is nothing you can lose here. Just play the game. Have fun and enjoy that miracle, called life.

When the text is over, tune yourself into complete relaxation and give yourself a worm hug for the good work you just did. Close your eyes. Put a smile in your face as you always did as a child before to fall asleep and enjoy your dreams.

## Repetition Continues

So, here comes the morning. You had a wonderful night sleeping time. The new day is knocking on the window. Give it a smile. It's a gorgeous new day coming into your life. You are blessed to enjoy that day. Embrace it with your entire hearth.

Reach and grab the chapter you've covered last night. Go through it with all the energy and enthusiasm within you. Just go through it. Read it entirely and enjoy all the new sparks and fountains of joy you'll experience while doing that.

Those sparks and fountains of joy will come from the new information you'll get while reading the text. You'll be amazed how easy to read and follow through the text is.

How do I now that? It's a science guys. If you follow the steps above exactly, there will be fountains of joy within you.

Hint: when you see a spark or a fountain of joy emerging within, due to the new revelation when reading the text, channel that energy into more enthusiastic reading.

When you finish reading, you may feel that new thoughts are emerging in the mind. So here comes the pen and the notebook. Remember, they have to be always ready next your bed.

Grab them and allow whatever is within to come out!

Forget about the grammar, structure or the meaning of what you are writing down!

Just keep on writing with all the enthusiasm, passion, glory and light within! Keep the momentum, the flow running and the most importantly – Enjoy it!

Enjoy the precious moment of creation, the very moment of life. Life is what you feel within right here and right now. All the rest is just an illusion.

It may be difficult when you do it for the first time. Just take the pen and start writing whatever comes to your mind and hand. Nobody is going to see that. It is just for you. Do it! Have fun!

There is a beauty in this moment, too. You'll keep very precious memories about your first efforts to create your own ideas, thoughts, projects, home works and whatever you have to do in this exciting way.

What if you don't experience any of that? Congratulation! You are on your way to find your fountains of joy, too. As long as you keep on doing it, the results will come to you. The only way to get no result is to avoid doing it.

What is the purpose of that step? O.K., your mind have been soaked up last night with information. Due to keeping the mind in a very relaxed state, while reading, listening or watching, the information has been allowed to enter into your subconscious mind realms.

And here is the beauty of everything: your subconscious mind is connected to the subconscious minds of everybody and everything in this creation. In fact, on subconscious level you have the access to entire kingdom of knowledge.

I see a question you want to ask here: how that could be? The answer is simple: It is the way it is? This is how the initial set up

has been launched. You want to know more about that. Look for the [next book](#) from that project.

The above statement is not just a mambo-jumbo. The latest discoveries in quantum physics proved that on subatomic level we are all connected. So, it is pure science, you are going to use here and boost your performance in studying and everything you do.

If we have that access granted, why we cannot open the door to it? The good news is that some folks already opened that door. The next good news is that you can do it, too. You want to know how – keep on reading. You are on the right track.

## More about Repetitions

The main trick here is to be as relaxed as you can be during the night reading. It is important to avoid any reflection and rationalizing. Remember, keep it simple and enjoy your life here and now.

The above is very difficult to be achieved, usually, by the smart guys. Their problem comes from the ego. The common approach here is: I have to understand this thing right now! ... Ouch! It doesn't work like this.

While doing that, one is creating mental blockages into conscious and subconscious minds. So, the information is totally rejected. It cannot be processed by the subconscious mind. As a result, we enjoy what is called the opposite of success.

I considered myself being a smart for a very long time. Here is why it took me 30 years to get it 😊. So, the choice is yours. Follow your ego or dump it! Give it a try. Dump your ego and see what the outcome is. If you like it – do it again.

Here is the most important hint I have to share with you: Every time you find yourself out of the success – enjoy it. You are on the right track.

Remember, every time you trip, you are creating a stepping stone towards your success. Many folks get it the other way and they just stay there on the other side of the successful life.

You are actually on your way to create something very unique – your signature method of achieving a new knowledge. Once you

master your new discovery, you are ready to enjoy all of its benefits.

Writing your thoughts after morning reading is an act of opening the inner door of the unlimited knowledge we have been talking above. In the beginning you may not be very inspired from what comes out. Just keep on writing and do not pay attention to quality.

It is a fundamental law in the nature: Quality comes after quantity. You may need to make enough attempts before to reach the level of the masters.

Nothing comes without a price. As long as you spend your time on something, you pay the highest possible price – the Time of Your Life.

If you remove the plug from a barrel, kept in sealed condition for thousands of years, what do you expect to come out first? It will take some time and exercise until the pure inner quantity start to appear from within.

Be inspired in what you are doing and believe in the final outcome with your entire hearth. Channel the energy of every cell in your body towards the final goal. Nothing should be able to put you out of the track even for a second. Keep on writing, whatever comes into your mind.

If a dry period comes, do not be discouraged. Inflate your tires with passion and enthusiasm. Know that you are doing the right thing and the results will not shy to come to you, when you are ready to meet them.

Repeat the above steps for every section, until the end of the text. Every evening/morning read one and the same part of the book,

only. If this is a short article or lesson you may decide to do it on one session.

## **Step 5: Act as per Your Goal**

So what's next? The next step is completely in your hands now. Follow the path to materialize your goal as per your plan. If you feel an inner desire within, be creative and feel free to expand the outcome beyond the limits of your initial goal.

If you are happy with the level of understanding you achieved, just go ahead and do whatever you have to do: write your homework, article, essay, recommendation, testimonial, book, resume, project and whatever your next step or goal is.

Here comes in hand the outcome of your morning writing exercises. You'll find a lot of good quantity there. Use it, digest it, reformat it and rewrite it until you reach the level of total comfort with the final outcome.

Your first informational product is right in front of you. This is your baby. Make some inner preparation, before to release it to the world.

See your product reaching the other people. See how happy they are when they go through it. See yourself next to them. Listen to the nice words they are telling you.

Create the entire movie of total success using your imagination. Enjoy that movie with all your heart. When you are ready, release that movie from your head and send it to the Universe.

Now is the time to submit your final product as per your initial plan. Here comes the Action step again. Just do it.

In many instances you are going to read, listen or watch something just to acquire knowledge you need for the moment. If there is no obligation to create any product, make sure that you keep writing your notes and collect them into an article or an abstract of the knowledge you just got.

The only way to affix strong records within your memory about something is to reflect on that and to write down your thoughts. And this is all about performing the steps as described above.

I have been wandering many times, why smart people like Edison and Einstein write memos over the sides of the pages they study? The answer is simple: They reflect on what they read and they write down their thoughts.

You want to get closer to them – copy their habits. Do what they did.

## Conclusion

Now you have all the knowledge about how to acquire any kind of information you want. It is all in your hands to use it and achieve incredible results during that very life. The age doesn't matter here. It is all about how you feel inside.

Sooner or later you'll be tempted to use the above system and you'll enjoy all the magic outcomes as I do.

By applying the above steps in my learning practice I was able to create and achieve amazing results on many different fields of life.

I created a system to improve my own health, resulted in the following:

Since 1999,

- I have never visited a doctor, except for the purpose of getting health certificate
- I possess no single pill or medicine in my home and never use drugs
- I never use any of those widely recommended supplements

Why? - I don't need to do that. My health is as perfect as never been before in my life and is constantly improving.

This system has been proven by applying it to the members of my family. They are enjoying the same benefits, described above. But, the most amazing results has been achieved by applying that health system to my mom.

My mom had been diagnosed for colon cancer in 1997. She went through operation and chemo therapy. In 1998 she went to another screening and I was told that cancer formations have been spread all over her abdominal part of the body.

Six months later she was cured completely, by applying the system mentioned above. Now, she is enjoying her life and that is something nobody can take away from me. What could be more rewarding from saving the life of those who gave to you that very life!

If you want to achieve that state of complete independence from the enormous hype around the health and drug industries? Then watch for my next book: [How to Achieve Perfect Health](#).

But that is just the beginning of what you'll find as my project develops into extremely valuable source of information on [Building Enormous Personal Energy](#); [How to Discover and Use Your Mind Power](#); [How to Enjoy Your World of Emotions](#); [Getting on The Path to Spiritual Ascending](#).

I'm very excited to create and share all this extremely valuable products with you. They will deliver to you knowledge and practical techniques, well guarded through the ages.

## **Important Information**

**Available to you for free for a limited time, only:**

## **How to build your financial empire:**

*Recently, a very useful knowledge about how to achieve financial freedom has been delivered to the public. A free access to all readers of that report is granted.*

**[Enjoy more than 30 hrs of high quality video!](#)**

## **How to use online marketing secrets:**

*This report arrived to you thanks to the knowledge I have been given from that particular place. Now, it is available to your for free. Go and take it.*

**[20+ hrs of free video lessons!](#)**

Thank you for reading.

## About The Author

*Teo Gee writes articles on a broad range of topics and delivers discourses on the secrets, revealed during the journey through the amazing fields of the Knowledge.*

*He continues to dedicate his time to the passion for writing and speaking about enormous opportunities for creating and developing a better world.*

*Teo Gee is delivering with enthusiasm the secrets, discovered while studying many well guarded ancient systems.*

***Enjoy your life here and now !***
